14th Annual Summit on

DATA ANALYTICS FOR HEALTHCARE

DECEMBER 8-9, 2026

Old Mill Toronto Hotel, Toronto, ON

From Fragmented Data to Intelligent Care: Building Trusted, Connected, and AI-Enabled Healthcare

Alberta Health Services · Hamilton Health Sciences · SickKids · lifemark HEALTH GROUP · UNITY HEALTH TORONTO · Ontario Health atHome · PACIFIC BLUE CROSS

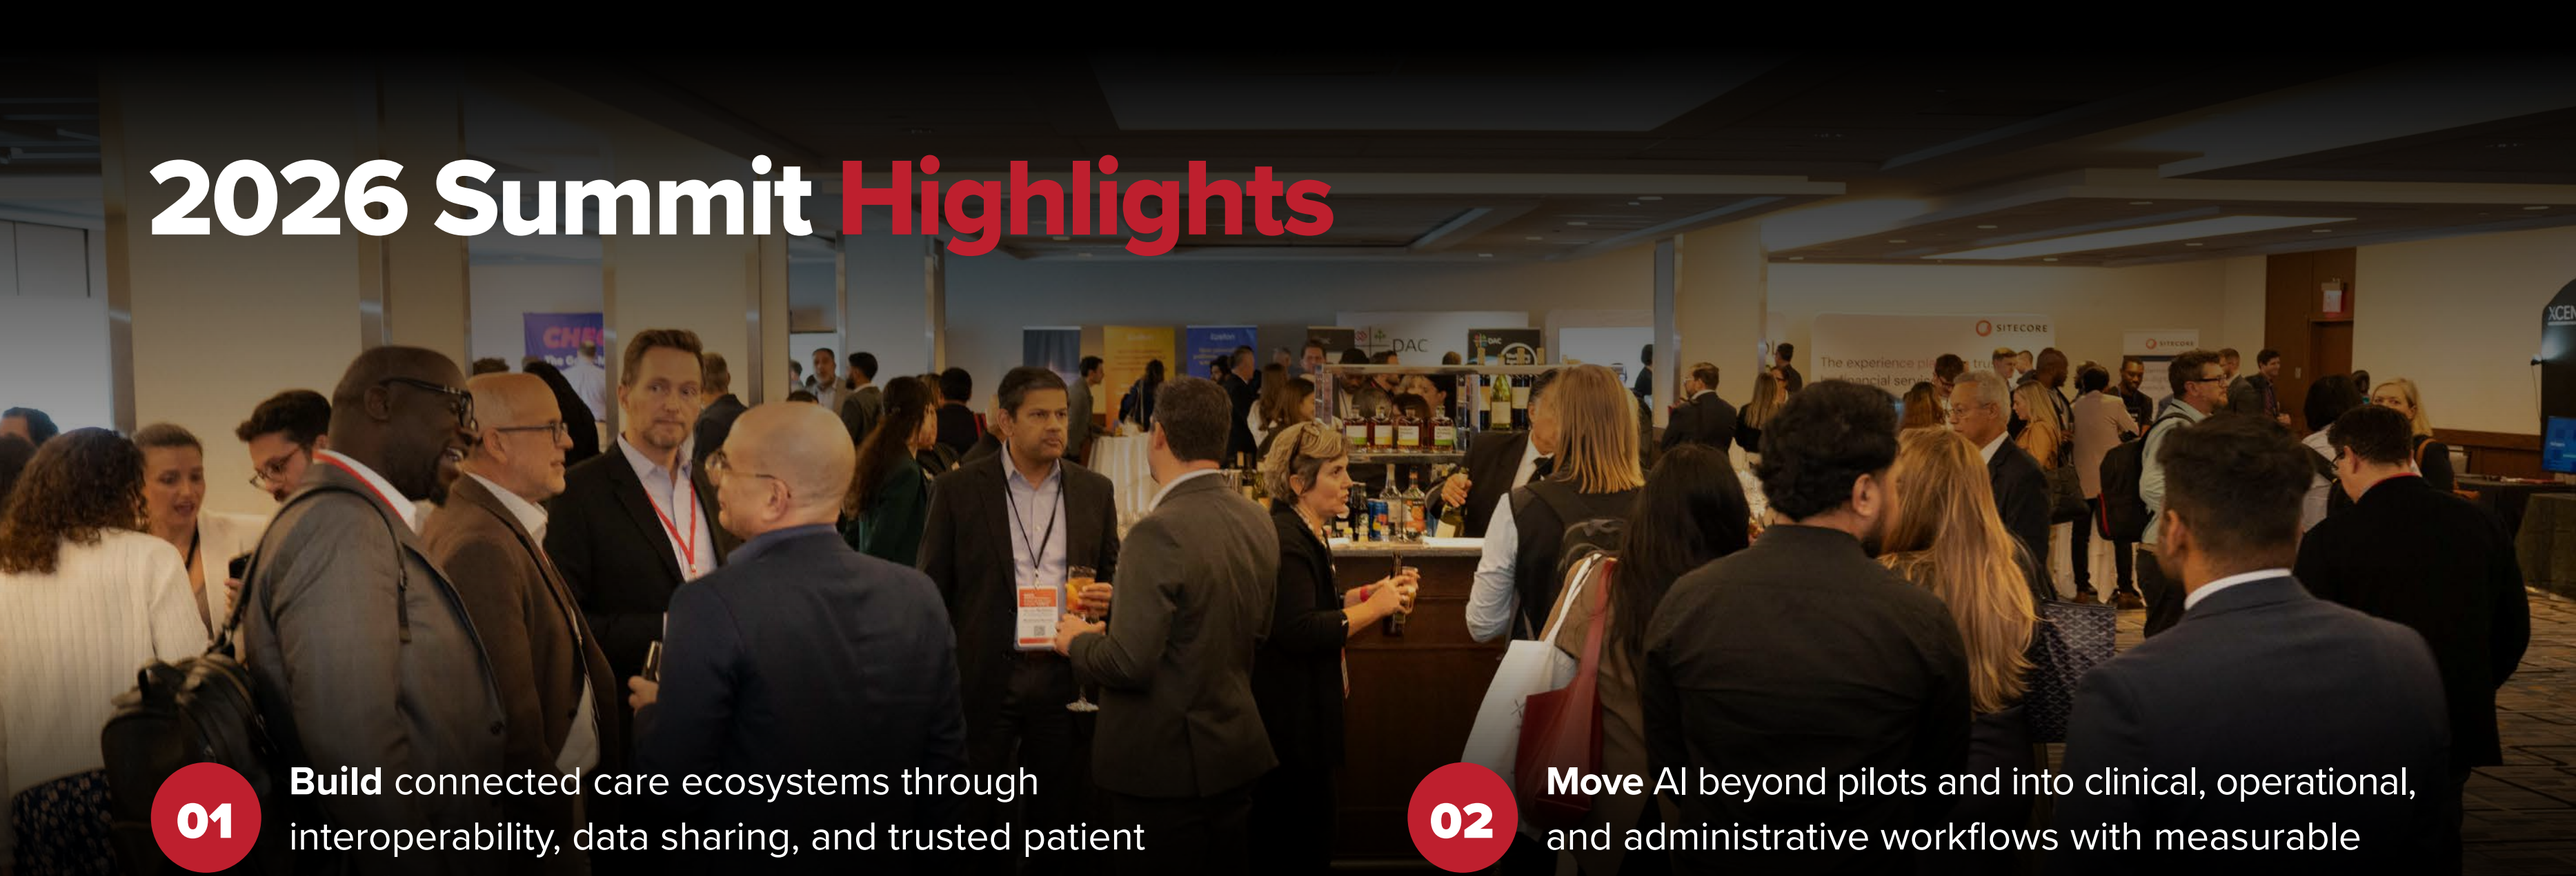

The working summit for Canadian healthcare leaders balancing innovation, connectivity, and transformation in the age of AI

Healthcare is entering a new era of intelligent care. As organizations face growing demand, workforce constraints, rising costs, and increasing expectations for personalized care, leaders must connect data, operationalize AI, and embed intelligence directly into clinical and operational workflows. This summit brings together healthcare innovators and decision-makers to share practical strategies for building trusted, connected, and AI-enabled health systems.

The program is built around peer-led case studies, panels, roundtables, and working sessions designed for implementation. You will exchange approaches with healthcare executives, clinical leaders, digital health innovators, and data professionals while leaving with practical frameworks for connected care, responsible AI, healthcare interoperability, operational intelligence, and scalable healthcare transformation.

2026 Summit Highlights

01 **Build** connected care ecosystems through interoperability, data sharing, and trusted patient data foundations.

02 **Move** AI beyond pilots and into clinical, operational, and administrative workflows with measurable impact.

03 **Improve** workforce productivity through intelligent automation, decision support, and AI-enabled ways of working.

04 **Develop** real-time operational intelligence to improve patient flow, capacity management, and resource allocation.

05 **Strengthen** governance, privacy, security, and responsible AI practices to maintain trust in high-stakes healthcare environments.

06 **Unlock** the value of unstructured clinical data using NLP, Generative AI, and emerging healthcare AI capabilities.

07 **Modernize** healthcare data platforms and infrastructure while reducing fragmentation, technical debt, and complexity.

08 **Connect** with Canada's healthcare data, analytics, digital health, and AI community to share lessons, strategies, and practical solutions.

Is Your Role Here?

If you work in any of the functions below, you'll take away practical strategies, frameworks, and peer-led insights you can apply immediately.

Data Leadership & Strategy

Chief Data Officers (CDOs), Chief Analytics Officers, Chief Digital Health Officers, VP of Data & Analytics, VP of Digital Health, Heads of Data & Analytics, Data Strategy, Enterprise Data, Information Management, Health System Transformation, Director of Data, Director of Analytics, and Decision Support Leaders

Analytics & Insights

Business Intelligence, Clinical Analytics, Population Health Analytics, Advanced Analytics, Data Science, Decision Support, Performance Measurement, Health System Planning, Reporting & Insights, Predictive Analytics, Operational Analytics, Quality Improvement Analytics, and Healthcare Research & Evaluation

AI, Governance, & Data Management

Artificial Intelligence, Machine Learning, Clinical AI, Responsible AI, AI Governance, Data Governance, Data Quality, Data Privacy, Information Governance, Health Information Management, Master Data Management, Interoperability, Risk Management, Cybersecurity, and Digital Trust

Technology & Transformation

Digital Health, Health Informatics, IT Leadership, Enterprise Architecture, Data Engineering, Data Platform Engineering, Cloud Architecture, Interoperability & Integration, Clinical Systems, Digital Transformation, Innovation, Program Delivery, Healthcare Technology, and Operational Excellence

Who Attends?

Senior healthcare data, analytics, AI, digital health, technology, and governance leaders from practitioner to executive level across Canada. This is a peer community focused on improving patient outcomes, enabling connected care, scaling trusted AI, strengthening governance, and turning data into measurable clinical, operational, and system-wide improvements.

Testimonials Trusted by Canada's Healthcare Data, Analytics, & AI Community

Don't just take our word for it! Here's what past delegates say about the takeaways, connections, and ROI.

"Very well organized, educational, with many opportunities to network. I'll be back next year!"

UNITY HEALTH TORONTO

"A fantastic line-up of speakers — very knowledgeable and future-thinking, with outside-the-box innovation in AI and healthcare."

VANCOUVER ISLAND health authority

"The speakers were super insightful — it was refreshing to see we are all experiencing the same barriers."

UNIVERSITY OF OTTAWA HEART INSTITUTE

"Now in my third year attending. A great forum for networking, sharing experiences, challenges, and lessons learned."

VANCOUVER ISLAND health authority

"The summit is not only for senior analysts and directors — it's also incredibly valuable for beginners. I appreciate the inclusion it provides."

UNIVERSITY OF TORONTO

"This summit is my must-attend event — I learn so much that I can take back to my organization and implement."

NORTH YORK GENERAL Here for life.

"A great event with lots of insightful presentations. There are so many use cases our organization and the system at large can benefit from."

Sinai Health

"Excellent and informative conference — I would definitely recommend this to colleagues."

DAY 01 Tuesday
December 8, 2026

Detailed Agenda

7:45–8:45 AM

Networking Breakfast: Build Relationships Across The Healthcare Data Community

- Start your day by connecting with **healthcare leaders** responsible for data, analytics, AI, digital health, clinical operations, and transformation.
- Discuss **common challenges** around interoperability, governance, workforce pressures, AI adoption, and system modernization.
- **Meet peers** working to improve patient outcomes, operational performance, and health system sustainability through better use of data and intelligence.

8:45–9:00 AM

Opening Comments From Your Host

Gain insight into today's sessions so you can maximize your conference experience and identify the conversations most relevant to your healthcare organization's priorities.

9:00–9:30 AM

Opening C-Suite Panel: From Fragmented Data to Intelligent Care

How to Build the Trusted Foundations for AI-Powered Healthcare

- Align data, analytics, and AI investments directly to patient outcomes, workforce priorities, and organizational objectives.
- Improve interoperability across providers, care settings, and healthcare ecosystems.
- Strengthen governance, trust, privacy, and accountability while enabling innovation.
- Achieve operating models capable of scaling intelligence across the organization.

Stafford Dean
CDO
Alberta Health Services

Patrick Lagioia
Director, Policy & Partnerships
Public Health Agency of Canada

9:30–10:00 AM

Industry Expert: Connecting The Care Continuum

How to Create a One Patient View Across Complex Healthcare Systems

- Improve interoperability across clinical, operational, and community care systems.
- Reduce fragmentation through common standards, governance, and information-sharing frameworks.
- Enhance patient experiences through connected healthcare information.
- Bolster population health, care coordination, and future AI initiatives.

10:00–10:30 AM

Speed Networking: Build Meaningful Healthcare Connections

- Participate in structured networking **designed to connect healthcare leaders** facing similar transformation challenges.
- **Exchange practical experiences**, discuss implementation lessons, and source new ideas.
- **Build relationships with peers** responsible for advancing healthcare data, analytics, AI, and digital transformation initiatives.

10:30–11:00 AM

Keynote: The Intelligent Health System

How to Lead Transformation Through Data, Analytics, and AI

- Align transformation initiatives directly to clinical, operational, and patient priorities.
- Improve decision-making through trusted analytics and actionable intelligence.
- Heighten workforce productivity through automation and AI-enabled workflows.
- Optimize and scale innovation beyond pilots to enterprise-wide adoption.

Stafford Dean
CDO
Alberta Health Services

11:00–11:30 AM

Exhibitor Lounge: Visit Booths & Source Expertise

- **Explore innovative technologies** supporting healthcare data, AI, interoperability, governance, cybersecurity, and digital transformation.
- **Discuss organizational priorities** with healthcare technology providers and solution specialists.
- Schedule one-to-one consultations and **source practical advice** for upcoming initiatives.

11:30–12:00 PM

Industry Expert: From One Patient View to Connected Care

How to Build the Data Foundations for Integrated Health Systems

- Improve integration across clinical, operational, and community care environments.
- Master trusted patient identity and information management capabilities.
- Advance care coordination through connected patient information.
- Perfect data foundations that support future analytics and AI initiatives.

12:00–12:30 PM

Panel: Modernizing Healthcare Without Disrupting Care

How to Transform Data Platforms While Maintaining Operational Stability

- Perfect healthcare data platforms without disrupting frontline care delivery.
- Improve scalability, resilience, and long-term operational flexibility.
- Reduce technical debt while supporting future innovation requirements.
- Align modernization investments to organizational and patient outcomes.

Muskur Jahan
Director, Data Management & AI
Medcan

Terence Hedley
Director, Informatics and Health Information
Peterborough Regional Hospital

Amos Hundert
Manager, Analytics & Continuous Improvement Mental Health and Addictions
IWK Health

12:30–1:30 PM

Networking Lunch: Delve into Healthcare Transformation Conversations

- **Meet speakers and peers** working through similar healthcare transformation challenges.
- Discuss interoperability, governance, AI adoption, workforce pressures, and **digital health strategies**.
- **Expand your professional network** while continuing conversations from the morning sessions.

1:30–1:45 PM

Exhibitor Lounge: Visit Booths & Win Prizes

- Explore sponsor demonstrations and **healthcare technology innovations.**
- **Discuss implementation challenges** with healthcare solution providers.
- Enter prize draws and **access exclusive conference** resources and content.

1:45–2:15 PM

TRACK 1: HEALTHCARE STRATEGY & TRANSFORMATION

CASE STUDY: CONNECTED DATA

From Digital Strategy To Clinical Transformation: How to Build a Connected Health System

- Align digital, data and clinical strategies around the outcomes that matter most to patients, clinicians and the health system.
- Connect fragmented systems and information to give care teams more timely access to the data they need for clinical decision-making.
- Embed digital tools and data-driven insights into clinical workflows so technology supports rather than adds complexity to care delivery.
- Engage clinicians and operational teams throughout transformation to drive adoption, overcome resistance and ensure solutions reflect real-world needs.
- Scale successful initiatives beyond individual departments to create sustainable, organization-wide transformation.

Dr. Cheryl Williams
Executive VP, Clinical Operations and Chief Nursing Executive
Halton Healthcare

Siuwin Wang
Director of Digital Health
Halton Healthcare

TRACK 2: DATA FOUNDATIONS & INTEROPERABILITY

CASE STUDY: PREDICTIVE ANALYTICS

Predicting The Pressure- How to Use Predictive Analytics to Transform Patient Flow and Capacity Management

- Forecast patient volumes, admissions and capacity pressures before they become operational bottlenecks.
- Connect data across emergency, inpatient, discharge, staffing and other operational systems to create a more complete picture of patient flow.
- Translate predictive models into actionable insights that clinical and operational leaders can use in day-to-day capacity decisions.
- Align expected demand with staffing and resources to support more proactive capacity planning.
- Measure whether predictive insights are translating into improved flow, reduced delays and better experiences for patients and care teams.

Eugene Wong
Chief Data and Analytics Officer
Scarborough Health Network

2:20–2:45 PM

TRACK 1: HEALTHCARE STRATEGY & TRANSFORMATION

PRESENTATION— CONNECTED HEALTHCARE

Unlocking Data for Public Health Action: Building Canada's Connected Health Data Ecosystem

- Connect PHISA's national approach to information sharing with CIHI's work on standards, interoperability and data stewardship to enable trusted information to move across Canada's health system.
- Navigate the governance, privacy, accountability and Indigenous data sovereignty considerations required to expand data sharing while creating the foundations for secondary use and AI.
- Turn national frameworks into practical action by exploring what governments, health authorities and healthcare organizations need to do differently to make trusted data available when and where it is needed.

Juliana Wu
Executive Director, Health Data Advancement
CIHI

TRACK 2: DATA FOUNDATIONS & INTEROPERABILITY

Finding the Missing Signals: How AI Unlocks Insights from Incomplete Patient Data

- Apply ML and AI techniques to identify meaningful patterns and relationships within incomplete longitudinal patient datasets.
- Bring together medical, clinical, analytics and data science expertise to interpret emerging signals, validate findings and distinguish meaningful insights from misleading patterns.
- Translate insights from fragmented longitudinal data into actionable evidence that supports clinical research, treatment strategies and better-informed healthcare decisions.

Gauri Dharkar
Associate Director, Advanced Medical Analytics
AstraZeneca

2:45–3:15 PM

TRACK 1: HEALTHCARE STRATEGY & TRANSFORMATION

USE CASE: RESPONSIBLE AI

Enabling Responsible AI Through Governance, Analytics, and Workflow Transformation

- Build the governance, stewardship, privacy, and risk management foundations required for responsible AI adoption.
- Establish modern analytics and AI infrastructure using trusted data products, semantic layers, knowledge assets, and scalable AI platforms.
- Embed policy, governance, and human oversight directly into operational workflows to maximize adoption, value realization, and risk management.
- Redesign business processes and decision pathways to leverage AI, automation, and advanced analytics at scale.
- Move beyond experimentation to deliver measurable impact across patient care, operations, workforce planning, research, and organizational performance.

Marlene Ross
CIO
Holland Bloorview Kids Rehabilitation Hospital

Sri Vijay Bharat Peddi
Director, Decision Support & Data Analytics
Holland Bloorview Kids Rehabilitation Hospital

TRACK 2: DATA FOUNDATIONS & INTEROPERABILITY

USE CASE: DATA PRODUCTS

How to Build Data Products People Actually Use

- Capture meaningful requirements through indicator methodologies, naming conventions and clearly defined user personas.
- Translate user needs into effective wireframes that validate structure, information hierarchy and functionality before development begins.
- Prototype accessible, intuitive experiences using swatch boards, accessibility principles and practical prototyping tools.
- Validate products through user acceptance testing to identify friction and improve usability before deployment.

Mohamedraza Khaki
Manager,
Decision Support
Ontario Health atHome

3:15 – 3:45 PM

Exhibitor Lounge: Attend Vendor Demos & Consult Industry Experts

- **Explore innovative healthcare technologies** and transformation strategies.
- Meet one-on-one with solution providers to **discuss organizational priorities**.
- Source practical advice and implementation guidance from **specialists across the healthcare ecosystem**.

3:45 – 4:15 PM

Case Study: Using Analytics to Build The Future Healthcare Workforce

How to Improve Workforce Planning, Capacity, and Resilience

- Advance workforce forecasting and capacity planning.
- Amplify emerging workforce risks and trends.
- Transform and support workforce wellbeing and retention strategies.
- Align staffing decisions to organizational priorities.

Tony Bennett
Executive Director, HR Analytics & Planning
Alberta Health Services

4:15 – 4:45 PM

Case Study: Leading The Intelligent Health System

The Trust Equation: How To Navigate Bias, Data Shifts And Local Deployment In Healthcare Ai

- Identify algorithmic bias and gaps in training data before they translate into unequal performance across patient populations.
- Recognize domain and data shifts that can cause previously accurate models to deteriorate when introduced into new clinical environments.
- Validate AI against local populations, workflows and datasets rather than assuming performance will transfer between healthcare organizations.
- Calibrate models using rigorous statistical approaches to maintain accuracy, reliability and clinical relevance across different settings.

Pascal Tyrell
Director, Data Science
University of Toronto

4:45 – 5:00 PM

Closing Comments From Your Host

- **Review the key themes**, strategies, and lessons from today's sessions.
- Identify practical actions to **support your healthcare transformation initiatives**.
- **Prepare for a second day** focused on AI governance, clinical intelligence, and operational innovation.

5:00 – 6:00 PM

Networking Reception: Connect, Collaborate, & Continue The Conversation

- **Relax and unwind with peers** after a full day of learning and discussion.
- **Continue conversations** with speakers, sponsors, and fellow healthcare leaders.
- **Build relationships** that support future collaboration across Canada's healthcare ecosystem.

6:00 PM

Conference Adjourns to Day 2

DAY 02 Wednesday
December 9, 2026

Detailed Agenda

7:45–8:45 AM

Networking Breakfast: Reconnect With Your Healthcare Data Community

- Reconnect with peers and **continue conversations** from Day 1.
- **Compare approaches** to AI governance, healthcare analytics, and digital transformation.
- **Prepare for a day** focused on responsible AI, clinical intelligence, and operational innovation.

8:45–9:00 AM

Opening Comments From Your Host

Gain insight into today's sessions and discover the practical strategies shaping the next generation of intelligent healthcare systems.

9:00–9:30 AM

Opening Panel: Interoperability

Beyond Technical Interoperability: Tackling the Policy- and People-Driven Barriers to Advancing Digital Health and Connected Data in Canada

- Optimize the policy and human factors which are instrumental to a connected data future.
- Connect data governance, data literacy, and policy together more effectively
- Realize a connected, person-centered health data system

Evelyn Pyper
Health Data Strategy Lead
Roche Canada

Ewan Affleck
Senior Medical Advisor – Health Informatics
College of Physicians and Surgeons of Alberta

Alies Maybee
Co-founder and Co-Chair
Patient Advisors Network

9:30–10:00 AM

Industry Expert: Unlocking The Clinical Narrative

How Generative AI is Transforming Unstructured Healthcare Data

- Excel and extract actionable intelligence from unstructured healthcare data.
- Improve clinical documentation, coding, and information retrieval.
- Bolster research, operational planning, and patient care initiatives.
- Achieve and govern unstructured data use responsibly and securely.

10:00–10:45 AM

Roundtables: Discover Thought-Provoking Ideas

- **Topic 1:** Implementing Clinical GenAI Safely: Lessons from Early Deployments.
- **Topic 2:** From AI Pilot to Clinical Workflow: What Actually Scales?
- **Topic 3:** Building Trust in AI Recommendations and Clinical Decision Support.
- **Topic 4:** Predictive Analytics for Patient Flow and Capacity Management.
- **Topic 5:** Balancing Privacy, Consent, and Innovation in Healthcare AI.

10:45–11:15 AM

Exhibitor Lounge: Visit Booths & Source Expertise

- **Meet healthcare technology providers** supporting AI, analytics, interoperability, cybersecurity, governance, and digital transformation.
- Discuss practical implementation challenges and **source expert guidance**.
- Schedule one-on-one consultations **tailored to your organization's priorities**.

11:00–11:30 AM

TRACK 1 – HOSPITAL SYSTEM FUNDAMENTALS FOR THE AI ERA

CASE STUDY: THE INTELLIGENT HEALTH SYSTEM

How to Lead Transformation Through Data, Analytics, and AI

- Align transformation initiatives directly to clinical, operational, and patient priorities.
- Improve decision-making through trusted analytics and actionable intelligence.
- Heighten workforce productivity through automation and AI-enabled workflows.
- Optimize and scale innovation beyond pilots to enterprise-wide adoption.

Justin Saindon
Director, Digital Transformation & Analytics
Niagara Health

Kimberley Hill
Director, Data Governance
North York General Hospital

TRACK 2- THE FUTURE OF DATA IN HOLISTIC HEALTHCARE

CASE STUDY: DATA DRIVEN INNOVATION IN PHARMA

Beyond the drug: How Data Can Connect Pharma and Health Systems Across the Patient Journey

- Connect clinical, pharmaceutical and real-world data to generate a more complete view of patient pathways and outcomes.
- Break down organizational and technical data silos through stronger interoperability, standards and information-sharing frameworks.
- Establish governance, privacy and consent models that enable valuable collaboration while maintaining appropriate controls over sensitive health data.
- Apply analytics and AI to combined datasets to identify risk earlier,understand treatment effectiveness and uncover opportunities for better intervention.
- Operationalize shared insights so that data collaboration translates into measurable improvements in clinical decisions, patient outcomes and system performance.

Jonathan Wiersma
Director - Data and Analytics Centre
Johnson and Johnson

Alexander Henderson
VP Medical Affair
Johnson and Johnson Innovative Medicine Canada

Joel Beauchamp-Guay
Sr Ldr Market Engagement Excellence & SO
Johnson and Johnson Innovative Medicine Canada

11:30–12:00 PM

TRACK 1 – HOSPITAL SYSTEM FUNDAMENTALS FOR THE AI ERA

PANEL: AI INNOVATION AND ROI FROM DATA SCIENCE TO CARE DELIVERY

How to Turn AI Innovation Into Measurable Healthcare Impact

- Prioritize data science and AI opportunities around clearly defined clinical and operational challenges rather than technology-led experimentation.
- Translate complex healthcare data into models and insights that clinicians and operational leaders can confidently use.
- Integrate analytics and AI into existing workflows so insights reach the right people at the right point in decision-making.
- Validate solutions for accuracy, safety, usability and real-world impact before moving from experimentation into broader deployment.
- Measure whether data science initiatives are improving outcomes, efficiency and decision-making — and use that evidence to determine what should scale.

TRACK 2- THE FUTURE OF DATA IN HOLISTIC HEALTHCARE

PANEL: COLLABORATION MODELS

Beyond the Hospital - How to Break Down the Data Barriers to a Truly Connected Healthcare Ecosystem

- Identify the technical, regulatory and organizational barriers preventing valuable health data from flowing safely across the wider ecosystem.
- Establish trusted governance, consent and data-sharing frameworks that enable collaboration without compromising privacy, security or accountability.
- Connect clinical data with pharmaceutical, MedTech, diagnostic and real-world data to develop a more holistic understanding of patients and their journeys.
- Align standards, architectures and interoperability approaches so insights can move between organizations and become usable within clinical workflows.

12:00–12:30 PM — Networking Lunch: Continue The Ai Conversation

- Meet speakers, reconnect with peers, and **continue conversations** around AI governance, healthcare innovation, and operational intelligence.
- **Share lessons** learned and discuss practical implementation strategies.
- Build relationships with leaders **shaping the future of healthcare AI**.

12:30–1:15 PM — Exhibitor Lounge: Visit Booths & Win Prizes

- **Explore healthcare AI demonstrations** and emerging analytics technologies.
- Meet with solution providers and **discuss implementation priorities**.
- Enter prize draws and **access exclusive conference resources**.

1:15–2:15 PM

TRACK 1: AI TRACK

CASE STUDY: IMPLEMENTING CLINICAL GENAI SAFELY

How to Learn Lessons from Early Healthcare Deployments

- Perfect appropriate use cases for clinical generative AI.
- Adapt validation and monitoring practices.
- Reduce safety and compliance risks.
- Strengthen clinician confidence and adoption.

TRACK 2: FOUNDATION TRACK

Building The Data Foundations For Integrated Care- Lessons from East Toronto's Chronic Disease Pathways

- Connect fragmented data across hospitals, primary care, home care and community partners to support a more coordinated patient journey.
- Standardize referrals, data capture and reporting so information can move more consistently between organizations and care settings.
- Integrate tools such as REDCap, dashboards and reporting capabilities into operational workflows rather than creating additional layers of complexity.
- Govern data across organizational boundaries to improve quality, consistency, accountability and trust.

Rishma Pradhan
Manager, OHT Development and Care Integration
East Toronto Health Partners

1:45–2:15 PM

TRACK 1: AI

USE CASE

From Trusted Data To Trusted Healthcare Intelligence: How to Build the Governance and Standards Foundation for Analytics and AI

- Establish clear business accountability and standards-enabled governance for critical data assets, moving from reactive data-quality fixes towards proactive management of trusted information.
- Connect product, location, organization and event data using standards such as GTINs and GLNs to strengthen interoperability, supply-chain visibility, traceability and regulatory readiness.
- Build sufficiently consistent and trusted data across suppliers, distributors, hospitals and care environments to support operational intelligence today and scale automation and AI tomorrow.

George Craigie
Senior Director, Data Management & Analytics
McKesson

Anjan Sidhu
Vice President, Healthcare
GS1 Canada

TRACK 2: FOUNDATION

USE CASE

From Principle to Proof: Can Data and Innovation Keep Health Equity on the Healthcare Agenda?

- Demonstrate where equity-focused data and analytics are delivering measurable improvements in access, experience and health outcomes.
- Explore innovative use cases where organizations are redesigning pathways, targeting interventions and allocating resources based on a deeper understanding of patient need.
- Examine how AI could either reduce or reinforce existing inequalities — and what data leaders must do to ensure emerging technologies work effectively across different populations.
- Debate what the next generation of health equity should look like as healthcare organizations respond to changing economic, political and societal priorities.

Hannah Chan
Chief Operating Officer
Skinopathy

Rochelle Reidm
Chief Health Equity Officer
Hamilton Health Sciences
Moderator

2:15–3:00 PM

TRACK 1:AI

WORKSHOP: DEVELOPING RESPONSIBLE AI CONTROLS

How to Achieve Governance for High-Stakes Healthcare Environments

- Achieve practical responsible AI frameworks.
- Improve transparency and accountability.
- Reduce bias, safety, and compliance risks.
- Bolster trust in AI-supported decisions.

TRACK 2: FOUNDATION

WORKSHOP: DATA STEWARDSHIP

From Data Stewardship to Action: Building the Foundations for Canada's Connected Health Data Ecosystem

- Translate national data stewardship principles into organizational practice by defining governance structures, accountability, data ownership and the processes required to manage and share trusted health information.
- Explore practical implementation approaches through real-world case studies, identifying the technical, organizational and interoperability requirements for participating in connected health data initiatives.
- Develop an actionable implementation plan that aligns local data strategies with emerging national frameworks, identifying priority investments, partnership opportunities and immediate next steps towards AI readiness.

Anne Forsyth
Director, Hospital Data Transformation
CIHI

3:00–3:45 PM

Exhibitor Lounge: Attend Vendor Demos & Consult Industry Experts

- **Explore innovative healthcare** AI technologies and implementation strategies.
- Meet one-on-one with experts and **discuss practical organizational challenges**.
- Source actionable ideas to **support healthcare transformation initiatives**.

3:45–4:15 PM

Case Study

Better Is Bigger Than ROI — Better Work. Better Outcomes. Better for You.

- Reframe how you approach technology and innovation by looking beyond individual problems and traditional measures of ROI towards the broader improvements you want to create.
- Apply practical projects, prompts, repositories and ideas that demonstrate how emerging technologies can make work, services and experiences meaningfully better.
- Use a simple "better" framework to evaluate opportunities throughout the summit and bring a more purposeful lens to the technology decisions you make afterwards.

David Parker
Founder
Wishplay

4:15–4:45 PM

Case Study: Enterprise AI Adoption in Healthcare

How to Build the Organizational Foundations for Sustainable Transformation

- Improve organizational readiness for AI adoption.
- Align stakeholders around common objectives.
- Increase workforce engagement and capability development.
- Bolster innovation across the healthcare enterprise.

Manish Verma
Digital Excellence Manager
EMD Serono

4:45–5:30 PM

Closing Panel: The Intelligent Health System 2030

What Will Separate Healthcare Leaders from Everyone Else?

- Impact the capabilities that will define healthcare leadership over the next five years.
- Bolster investment across data, analytics, AI, and digital health initiatives.
- Adapt to rapid technological change while maintaining trust and accountability.
- Excel your organization for long-term success in an increasingly intelligent healthcare environment.

Alison Paprica
Vice President,
Health Strategy & Partnerships
Vector Institute for Artificial Intelligence

5:30–5:45 PM

Closing Comments From Your Host

- **Review the key themes**, lessons, and implementation strategies discussed throughout the conference.
- **Identify practical next steps** to support your organization's healthcare transformation journey.
- **Leave with a clear understanding** of the priorities shaping the future of healthcare data, analytics, and AI.

5:45 PM

Conference Concludes

Thank you for joining the Data Analytics for Healthcare Summit 2026. Safe travels, and we look forward to welcoming you back next year.

Stay at the Old Mill Toronto

Charming, character-filled, and conveniently located

The Old Mill Toronto Hotel is nestled along the Humber River in Toronto's west end, with easy access from downtown Toronto, the GTA, and Toronto Pearson International Airport. With its historic charm and boutique setting, it offers a more memorable experience than a standard conference hotel.

Located between Bloor West Village and The Kingsway, the hotel sits in one of Toronto's most scenic and established neighbourhoods — known for its peaceful parks and trails, golf courses, unique shops, and local dining options.

Built for Networking

Elegant event spaces, an onsite restaurant, bar, and lounge create natural settings to connect with attendees, speakers, and sponsors before and after sessions — without ever leaving the property.

Comfortable, Self-Contained Stay

Boutique guest rooms with modern amenities, onsite dining for coffee, breakfast, and evening drinks keep your team focused and fueled throughout both days.

DISCOUNTED ROOM RATE

$379/night

Available on a first-come basis whilst rooms are available.

Save travel time and arrive ready for the event by staying onsite.

A discounted room rate of **$379/night** is available until **November 23, 2026**, on a first-come, first-served basis while rooms remain available.

Canada's Leading Healthcare Data, Analytics & Ai Summit

- **TURN DATA & AI INTO BETTER PATIENT OUTCOMES:**
  Discover how healthcare leaders are moving beyond digital transformation to deliver measurable improvements in patient care, efficiency and health system performance.

- **BREAK DOWN DATA SILOS FOR CONNECTED CARE:**
  Explore practical strategies for improving interoperability, data sharing and integration across healthcare systems.

- **MOVE HEALTHCARE AI FROM PILOT TO PRACTICE:**
  Learn how to scale AI across clinical and operational workflows while demonstrating real-world value.

- **BUILD TRUSTED FOUNDATIONS FOR RESPONSIBLE AI:**
  Strengthen data governance, privacy, accountability and patient safety without slowing innovation.

- **USE PREDICTIVE ANALYTICS TO IMPROVE PATIENT FLOW:**
  Anticipate demand, optimize capacity and make smarter decisions around staffing, resources and care delivery.

- **REDUCE WORKFORCE PRESSURES THROUGH AI & AUTOMATION:**
  Explore how intelligent workflows can reduce administrative burden, support clinicians and improve productivity.

- **TURN HEALTHCARE DATA INTO ACTIONABLE INTELLIGENCE:**
  Move beyond traditional reporting to embed real-time insights into clinical decisions and daily operations.

- **CONNECT WITH CANADA'S HEALTHCARE DATA & AI LEADERS:**
  Benchmark strategies with senior leaders from hospitals, health authorities, government, life sciences and research.
